

# HEARTWOOD

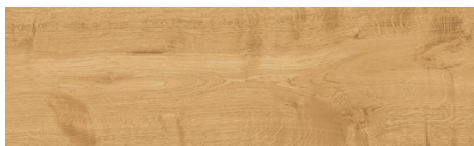

Just as wood preserves and cherishes its natural beauty in the genetic memory of its veining, stratified over time, the Heartwood collection of porcelain tiles prepares to take authentic and precious stories of contemporary elegance into its surfaces and deep into its heart.

The collection takes inspiration from the finest Italian oak, one of the most prized hardwoods of all together with French oak and typically used in elegant, grand settings such a period villas and palazzos in European historical city centers, from Milan, Paris and Florence to Munich, Rome and Vienna.
