

# Native Metals

Native Metal captures the eternal luxury of patinaed minerals and ores in a refreshingly unique porcelain and resin tile line. The collection features six unique porcelain tiles finished with multiple glaze techniques. Resin wall accents formulated with real metals provide two rectilinear decorative pieces — waves and dots. Carefully and responsibly made in the USA, Native Metal offers a luxuriously creative approach you can feel good about. It is entirely made in the USA, and is one of Crossville's first Carbon Neutral tile collections.
